

Foolproof Pinewood Derby Classic Race Rules!

- Total finished car weight cannot exceed 5.0 ounces.
- The scale used by the race officials provides the final race weight.
- Total car dimensions cannot exceed 7" in length, 2.75" in width and 5" in height. Note that height limits change depending on the clearance of finish gates.
- Clearance dimensions are as follow: 1.75" between wheels and 0.375" beneath body.
- The wood block provided in the kit must be used in the car.
- The wheels and axles supplied with the kit must be used. Seams can typically be removed from wheels but NOT tread. Axles may be polished to remove stamp marks, crimp marks or other imperfections.
- The car must be freewheeling, with no starting devices, mechanical speed enhancers, springs, or wheel bearings.
- No loose material of any kind can used on or in the car – including weights.
- All weights and other attachments must be properly secured to the car.
- **All decisions by the inspection committee are final.**
